Reading

PROFILE

I am a second year Software Engineering Student with a passion for software development and the impact it can have on the world.

While being keen to explore the different branches of software development, I am currently focusing on web development technologies and looking for a working student/internship position to test my skills in real world projects and problems.

You can visit my Github page to see the projects I have worked on.

EXPERIENCE

Teaching Assistant: CODE University (05.2019 - present)

- participating in decision making processes for the curriculum
- assisting the new students on learning programming using Python
- facilitating Q&A, group coding challenges and feedback sessions
- assessing semester projects

Product Manager: lavarla.com (12.2015 - 07.2016)

- researching and reaching out to potential partners
- controlling social media accounts and engaging with followers
- participating in marketing and business strategy meetings
- organizing event sites and logistics
